

SHANU ABHISHEK

Customer Support Specialist — Technical Support & Platform Operations

Bengaluru, Karnataka, India | +91 7004049374 | shanuabhishek60@gmail.com | linkedin.com/shanuabhishek

PROFESSIONAL SUMMARY

Customer-facing Technical Support professional with 2+ years resolving escalated end-user issues via call, email, and chat for a 12,000+ user enterprise platform (Siemens Teamcenter PLM, NX CAD), maintaining 95%+ SLA compliance while managing high daily ticket volume. Experienced using ServiceNow and Jira to log, triage, and track customer cases end-to-end, translating technical root causes into clear, actionable guidance for non-technical users. Comfortable working under time pressure and shifting priorities, with a track record of partnering with Engineering and Product teams to feed customer insights back into the product. Bachelor's degree in Computer Science; strong written and verbal English communication in technical, customer-facing settings.

CORE COMPETENCIES

- **Customer Support:** Email, Chat & Video Support · Issue Resolution · Customer Communication · Complaint Handling · Customer Satisfaction
- **Case & Ticket Management:** ServiceNow · Jira · Ticket Triage · Documentation · Case Tracking · Knowledge Base Creation
- **Support Operations:** Incident Management · Escalation Handling · SLA Management · Root Cause Analysis · Process Improvement
- **Technical Tools:** REST APIs · SQL · Python · Log Analysis · Slack API · JSON · Command-Line Diagnostics (Windows & Linux)
- **Collaboration:** Cross-functional work with Product & Engineering · Customer Feedback Loops · Agile Teams

PROFESSIONAL EXPERIENCE

Software Developer — Technical & Customer Support

June 2024 – Present

Bengaluru, Karnataka

- Serve as front-line technical support contact for Siemens Teamcenter and NX CAD, resolving customer and end-user issues via call, email, and chat — handling ~20 cases weekly in ServiceNow with 95%+ SLA compliance
- Own customer issues end-to-end: diagnose the root cause, determine the right fix, explain it in plain language to non-technical users, and follow up to confirm resolution
- Resolve 20–50 workflow and system issues daily (with spikes during patch/version updates) across a 12,000-user base, using ticket history and direct database diagnostics to identify recurring problems
- Document recurring issues and fixes to build out internal knowledge base content, reducing repeat escalations for common problems
- Built a customer-facing Teamcenter notification framework (tracked in Jira) serving ~12,000 end users — gathered requirements directly from business stakeholders and translated them into working product logic
- Automated KPI/support reporting, cutting report generation time from ~4 hours to under 1 minute; migrated the workflow to the ServiceNow API after a company-wide tooling change, keeping reporting reliable through the transition
- Built live monitoring and Slack-based alerting for 50+ hosts and 500+ services, catching operational issues before they become customer-facing incidents

Software Developer Intern — Technical Support

June 2023 – June 2024

Bengaluru, Karnataka

- Triage and resolved issues reported by engineering end users via Jira and ServiceNow tickets, working directly with the Teamcenter support team
- Practiced translating technical root causes into clear, actionable guidance for non-technical stakeholders — the foundation of the support workflow used today

Data Analyst Intern

May 2022 – July 2022

Hyderabad, India

- Queried and aggregated relational business data using SQL, then built Power BI dashboards surfacing key metrics for stakeholders — developed the data-literacy and stakeholder-communication skills now applied to customer case analysis

EDUCATION

Bachelor of Technology in Computer Science — Lovely Professional University, 2020–2024

ISC (Computer Science) — Rajendra Vidyalaya, 2018–2020
